

# FULL STACK CREATIVE DEVELOPER / CTO (MEDIOR+)

Are you a software jack-of-all-trades, do you want to build your own development team and grow with CityLegends? Then we are looking for you!

## **Introducing us**

We are an Eindhoven based start-up that markets an urban sports community-art platform worldwide. These urban sports, such as freerunning, are becoming increasingly popular, partly because skateboarding and BMX freestyle have been added to the Olympics. In recent years, this has also awakened brands and municipalities. CityLegends offers a digital environment where urban athletes are connected, they challenge each other, share hotspots, show and appreciate each other's passion. When, with whom and where they want to. CityLegends is also more than 'just an app'. We offer brands and cities creative activation campaigns to connect their city or brand more strongly to urban communities. Together with our partners, we work towards our goal: to become the most engaged and creative urban community worldwide.

*'The city is yours'*

## **What are you going to do?**

For CityLegends we are not looking for just any developer, but for an entrepreneurial creative developer. You are partly responsible for the designs, know-how of user experience design and are continuously working on how the start-up can grow faster online. We are not looking for hardcore developers, but a creative software legend ;-). For the entrepreneurial part, we are looking for someone who shares the same ambition, namely to conquer the world. And do you dare to have skin in the game?

## **You are**

A software jack-of-all-trades, creative, knows how to get things done and possibly with a dose of entrepreneurship. You want to advance in the digital world and want to (co-)work on new technologies such as Augmented Reality. You like to take on technological challenges that stand out in today's world and activate people. You are also curious about urban sports such as skateboarding, breakdance, BMX and freerunning.

## **What we expect**

- Graduate+ / HBO+ work and thinking level
- 3-5+ years of relevant experience
- Building your own development team with us in Eindhoven (NL)
- Excellent knowledge of web technologies such as Node and TypeScript (see stack next page)
- Being able to deal with Linux servers and NoSQL Databases
- Creative and careful working with delivered designs and mock-ups
- Flexible, social and collaborative skills
- Unique opportunity - Entrepreneurship: Being part of CityLegends and realising global impact.

*Above all, you think along with the wildest ideas for CityLegends!*

## **What do we offer?**

We offer the opportunity to work in a dynamic environment with global potential. You will be part of a committed urban team with a strong drive to make an impact in and outside of the Netherlands.

- Possible CTO function.
- Opportunity to work on the future of urban sports around the world.
- Dope projects with big cities and multinational brands
- Innovative projects with AR and Computer Vision
- Great growth opportunities - sky is the limit.
- The most legendary target group, urban sports & culture
- Confidence to fill in your own work and make your own planning
- Possibility to work with new techniques and tools
- Market conform salary and 25 holiday days based on experience
- 2 to 5 home working days and a workplace at urban hotspot Area51, Eindhoven

## **Are you the full stack developer and leader we are looking for?**

Interested? Then send your CV and a short motivation letter to Jimmy Hermans, co-founder CityLegends:

[Jimmy@citylegends.nl](mailto:Jimmy@citylegends.nl)

***Stack and expectation***
